

UNL ANCILLARY CALL CHECKLIST

PRE-CALL SETUP • WHAT TO ASK • WHAT TO PITCH

Not a script — a checklist. Run through this on every call before you start quoting.

PRE-CALL SETUP

- ☐ **Verify the client has Medicare.** Ask if they also have Medicaid.
- ☐ **Confirm they're in a state you're licensed in.**
- ☐ **Ask whether they have Medicare Advantage or a Medicare Supplement.** This drives which products to pitch.

ROUTING — WHAT TO PITCH

IF MEDICARE SUPPLEMENT

Pitch: Home Healthcare • Dental • TPRX

IF MEDICARE ADVANTAGE

Pitch: Cancer • TPRX • Hospital Indemnity • Home Healthcare • Dental (if needed)

HELPFUL QUESTIONS TO ASK

Use any of the prompts below to surface the gap and frame the product naturally — pick the one that fits the client's situation.

- a. Hospital cost framing.** *"Most people don't know they'll have to pay \$2,000–\$3,000 per hospitalization. Would a \$3,000 hospital bill be difficult for you to pay?"*
- b. Care-setting preference.** *"If something serious happened to you — a stroke or car accident, for example — and you needed daily help, would you want that at home or in a nursing home?"*
- c. Home healthcare cost framing.** *"Most people don't know they'll pay \$5,000 per month for home healthcare. Would you be able to pay \$5,000 per month if something happened?"*
- d. Prescription discovery.** *"Do you take any prescription medications?"* Surfaces basic health issues and helps frame TPRX reimbursement when pitching home healthcare.
- e. Home healthcare qualification.** *"Do you have Alzheimer's or dementia? Can you do all of your daily living activities?"*
These are qualification questions for home healthcare — required.

PAIR THIS WITH THE HIP SALES SCRIPT

Use this checklist at the open of every call to route correctly — then run the HIP Sales Script for hospital indemnity quotes and Bronze / Silver / Gold self-selection.
